**Subject:** Microsoft Lawsuit

To Whom It May Concern:

I want to express my opinion about Microsoft antitrust settlement.

I really want to get this lawsuit to over with, so my business can start focusing on Microsoft products and its future developments. I understand that Microsoft has done some mistakes, but that is in the past. I work at Fortune 10 company, and I rely on 'future technologies' to develop today's software for the company. It's the future of government that I am concerned about that affects Microsoft and my company's position on the computer software technologies.

I ask you to resolve it quickly, accept the settlement, and get it out of the Microsoft's way. That will save taxpayer's money, too. Also if the settlement is over with, then the sales at Microsoft will increase, therefore more tax money to the government.

Thanks,

Dan
